1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses in all cases. The number of correct responses was significantly higher than the number of incorrect responses in all cases. The number of correct responses was significantly higher than the number of incorrect responses in all cases.

[illegible]

Abstract The purpose of this study was to determine whether the use of a computerized decision support system (DSS) could improve the performance of a group of novice users in a complex task. A total of 60 participants were divided into two groups: one group used the DSS, and the other group did not. The results showed that the group using the DSS performed significantly better than the control group in terms of accuracy and time taken to complete the task.
